

## Silhouette Mint™ Stamping System

The Silhouette Mint™ is the most innovative and powerful custom stamping system on earth. The machine is a thermal printer which uses special inserts that react to the heat, creating 3D reliefs of the design on your stamp sheet.

It is built on powerful, custom software called Silhouette Mint Studio. Mint Studio is the key that unlocks countless design options. Like Silhouette Studio®, Mint Studio has access to the most diverse design library around: the Silhouette Design Store. Customers can either download a new design to convert it into a stamp or use an existing design in their personal design library.

**There are many other ways of creating a perfect stamp, including the following:**

- ▶ Turning text into a stamp using any font from your computer
- ▶ Creating your own design from within Mint Studio
- ▶ Importing any image into Mint Studio to create your stamp
- ▶ Turning a photo into an amazingly detailed stamp
- ▶ Combining any or all of these options to create whatever you can imagine

Transform your design into a stamp in just minutes with the Silhouette Mint™.
